Subject Index

Abrasion
the role of titanium in the abrasive wear resistance of physically vapour-deposited TiN, 63
Activated reactive evaporation
corrosion properties of TiC films prepared by activated reactive evaporation, 221
Adhesion
failure mode analysis of TiN-coated high speed steel: *in situ* scratch adhesion testing in the scanning electron microscope, 31
scratch adhesion testing of soft metallic coatings on glass, 135

Bearing materials
electron beam melting of bearing materials, 325
Boron
multilayer coatings – influence of fabrication parameters on constitution and properties, 179
sputter deposition of ultrahard coatings within the system Ti–B–C–N, 351

Cadmium
properties of CdTe films deposited by electron beam evaporation, 211
Carbides
corrosion properties of TiC films prepared by activated reactive evaporation, 221
multilayer coatings – influence of fabrication parameters on constitution and properties, 179
Carbon
sputter deposition of ultrahard coatings within the system Ti–B–C–N, 351
structural characterization of chromium carbide coatings deposited at low temperature by low pressure chemical vapour deposition using dicumene chromium, 51
Chemical vapour deposition
structural characterization of chromium carbide coatings deposited at low temperature by low pressure chemical vapour deposition using dicumene chromium, 51
Chromium
a study of Ni–Cr plasma-sprayed coatings on Inconel 625, 343
structural characterization of chromium carbide coatings deposited at low temperature by low pressure chemical vapour deposition using dicumene chromium, 51
Cobalt
effect of electrodeposition parameters on the microstructure and mechanical properties of Co–Ni alloys, 75
laser remelting of plasma-sprayed coatings on cobalt-based alloys, 365
Contact
stress behaviour of surface-coated materials in concentrated sliding contact, 1
Corrosion
corrosion properties of TiC films prepared by activated reactive evaporation, 221
improved corrosion resistance of physical vapour deposition coated TiN and ZrN, 191
optimization of wear and corrosion resistance of triode-ion-plated nitride coatings, 157
Cutting
how TiN coatings improve the performance of high speed steel cutting tools, 243

Dielectric properties
modification of the dielectric properties of parylene films by ion implantation, 205

Electrodeposition
effect of electrodeposition parameters on the microstructure and mechanical properties of Co–Ni alloys, 75
Electroless deposition
rapid evaluation of electroless nickel plating rate on various catalytic metallic substrates using the coulostat-

Elsevier Sequoia/Printed in The Netherlands

ic method with finite pulse width, 333
Electron beam evaporation
properties of CdTe films deposited by electron beam evaporation, 211
Electron beam melting
electron beam melting of bearing materials, 325

Failure
failure mode analysis of TiN-coated high speed steel: *in situ* scratch adhesion testing in the scanning electron microscope, 31

Glass
scratch adhesion testing of soft metallic coatings on glass, 135

Hobs
wear resistance of plasma-nitrided and sputter-ion-plated hobs, 17

Interface
effect of substrate material and residual atmosphere on the composition of the coating–substrate interface of nitride coatings, 167
Ion beam deposition
oxygen ion beam assisted thin film deposition, 259
Ion beam techniques
characterization of ion-nitrided titanium layers by means of X-ray microdiffractometry, 83
Ion implantation
high throughput metal-ion implantation system, 389
modification of the dielectric properties of parylene films by ion implantation, 205
Ion plating
improved corrosion resistance of physical vapour deposition coated TiN and ZrN, 191
nucleation and growth mechanisms in ion-plated TiN films on steel substrates, 285
wear resistance of plasma-nitrided and sputter-ion-plated hobs, 17

Laser remelting
laser remelting of plasma-sprayed coatings on cobalt-based alloys, 365
Lattice parameters
anomalies in the lattice parameters and residual stress of coatings made by physical vapor deposition methods, 231
Linescan test
a simple procedure for the characterization of spray deposition processes – the linescan test, 103

Mechanical properties
effect of electrodeposition parameters on the microstructure and mechanical properties of Co–Ni alloys, 75
Metallic coatings
scratch adhesion testing of soft metallic coatings on glass, 135
Microstructure
effect of electrodeposition parameters on the microstructure and mechanical properties of Co–Ni alloys, 75
Molybdenum
analysis of transfer films formed on steel and Co–WC during sliding against MoS_2-coated steel in argon, 93
preparation and properties of MoS_x films grown by d.c. magnetron sputtering, 127
Multilayer coatings
multilayer coatings – influence of fabrication parameters on constitution and properties, 179

Nickel
a study of Ni–Cr plasma-sprayed coatings on Inconel 625, 343
effect of electrodeposition parameters on the microstructure and mechanical properties of Co–Ni alloys, 75
rapid evaluation of electroless nickel plating rate on various catalytic metallic substrates using the coulostatic method with finite pulse width, 333
Nitrides
effect of substrate material and residual atmosphere on the composition of the coating–substrate interface of nitride coatings, 167
enhanced plasma nitriding at low pressures: a comparative study of d.c. and r.f. techniques, 295
how TiN coatings improve the performance of high speed steel cutting tools, 243

improved corrosion resistance of physical vapour deposition coated TiN and ZrN, 191
nucleation and growth mechanisms in ion-plated TiN films on steel substrates, 285
the sliding wear of titanium nitride coatings, 269
X-ray diffraction investigations of adherent and free standing TiN coatings deposited by magnetron sputtering, 377
Nitrogen
characterization of ion-nitrided titanium layers by means of X-ray microdiffractometry, 83
failure mode analysis of TiN-coated high speed steel: *in situ* scratch adhesion testing in the scanning electron microscope, 31
sputter deposition of ultrahard coatings within the system Ti–B–C–N, 351
the role of titanium in the abrasive wear resistance of physically vapour-deposited TiN, 63
wear resistance of plasma-nitrided and sputter-ion-plated hobs, 17

Organometallics
structural characterization of chromium carbide coatings deposited at low temperature by low pressure chemical vapour deposition using dicumene chromium, 51
Oxygen
oxygen ion beam assisted thin film deposition, 259

Particle velocities
mathematical simulation of particle velocities in a low pressure plasma jet and its experimental verification, 117
Parylene
modification of the dielectric properties of parylene films by ion implantation, 205
Plasmas
mathematical simulation of particle velocities in a low pressure plasma jet and its experimental verification, 117
Plasma deposition
thermal stability of partially-yttria-stabilized zirconia thermal barrier coatings deposited by r.f. plasma-assisted physical vapour deposition, 305
Plasma nitriding
enhanced plasma nitriding at low pressures: a comparative study of d.c. and r.f. techniques, 295
Plasma processing
wear resistance of plasma-nitrided and sputter-ion-plated hobs, 17
Plasma spraying
a study of Ni–Cr plasma-sprayed coatings on Inconel 625, 343
laser remelting of plasma-sprayed coatings on cobalt-based alloys, 365
Polymers
sputtering on polymeric composites, 315

Residual atmosphere
effect of substrate material and residual atmosphere on the composition of the coating–substrate interface of nitride coatings, 167

Scratch testing
scratch adhesion testing of soft metallic coatings on glass, 135
Sliding
analysis of transfer films formed on steel and Co–WC during sliding against MoS_2-coated steel in argon, 93
stress behaviour of surface-coated materials in concentrated sliding contact, 1
Spray deposition
a simple procedure for the characterization of spray deposition processes—the linescan test, 103
Spraying
the influence of physical properties and spraying parameters on the creation of residual thermal stresses during the spraying process, 147
Sputtering
anomalies in the lattice parameters and residual stress of coatings made by physical vapor deposition methods, 231
preparation and properties of MoS_x films grown by d.c. magnetron sputtering, 127
sputter deposition of ultrahard coatings within the system Ti–B–C–N, 351

sputtering on polymeric composites, 315
X-ray diffraction investigations of adherent and free standing TiN coatings deposited by magnetron sputtering, 377
Steel
analysis of transfer films formed on steel and Co–WC during sliding against MoS_2-coated steel in argon, 93
failure mode analysis of TiN-coated high speed steel: *in situ* scratch adhesion testing in the scanning electron microscope, 31
how TiN coatings improve the performance of high speed steel cutting tools, 243
nucleation and growth mechanisms in ion-plated TiN films on steel substrates, 285
Stress
anomalies in the lattice parameters and residual stress of coatings made by physical vapor deposition methods, 231
stress behaviour of surface-coated materials in concentrated sliding contact, 1
the influence of physical properties and spraying parameters on the creation of residual thermal stresses during the spraying process, 147
Substrate material
effect of substrate material and residual atmosphere on the composition of the coating–substrate interface of nitride coatings, 167
Sulphur
analysis of transfer films formed on steel and Co–WC during sliding against MoS_2-coated steel in argon, 93
preparation and properties of MoS_x films grown by d.c. magnetron sputtering, 127
Surface
stress behaviour of surface-coated materials in concentrated sliding contact, 1

Tellurium
properties of CdTe films deposited by electron beam evaporation, 211
Theoretical methods
mathematical simulation of particle velocities in a low pressure plasma jet and its experimental verification, 117
Titanium
characterization of ion-nitrided titanium layers by means of X-ray microdiffractometry, 83
failure mode analysis of TiN-coated high speed steel: *in situ* scratch adhesion testing in the scanning electron microscope, 31
how TiN coatings improve the performance of high speed steel cutting tools, 243
improved corrosion resistance of physical vapour deposition coated TiN and ZrN, 191
nucleation and growth mechanisms in ion-plated TiN films on steel substrates, 285
sputter deposition of ultrahard coatings within the system Ti–B–C–N, 351
the role of titanium in the abrasive wear resistance of physically vapour-deposited TiN, 63
the sliding wear of titanium nitride coatings, 269
X-ray diffraction investigations of adherent and free standing TiN coatings deposited by magnetron sputtering, 377
Tools
how TiN coatings improve the performance of high speed steel cutting tools, 243
Transfer
analysis of transfer films formed on steel and Co–WC during sliding against MoS_2-coated steel in argon, 93

Wear
optimization of wear and corrosion resistance of triode-ion-plated nitride coatings, 157
the role of titanium in the abrasive wear resistance of physically vapour-deposited TiN, 63
the sliding wear of titanium nitride coatings, 269
wear resistance of plasma-nitrided and sputter-ion-plated hobs, 17

X-ray techniques
characterization of ion-nitrided titanium layers by means of X-ray microdiffractometry, 83
X-ray diffraction investigations of adherent and free standing TiN coatings deposited by magnetron sputtering, 377

Zirconium
improved corrosion resistance of physical vapour deposition coated TiN and ZrN, 191
thermal stability of partially-yttria-stabilized zirconia thermal barrier coatings deposited by r.f. plasma-assisted physical vapour deposition, 305
